### STREET SWEEPING

The City of St. Marys, as part of road and street maintenance, implements a Street Sweeping Program in the spring of every year where they sweep and clean roads and streets throughout St. Marys. Also cleaned by the City are their paved parking lots and maintained sidewalks. Please note that sweepings are available to St. Marys residents only, but will not be delivered. A pile will be available at the old basketball court at Kaulmont Park. Residents are responsible for loading the sweepings and are limited to one load. This way every resident gets some.

Property owners/residents along the scheduled roads and streets are asked to sweep or rake any excess material into the gutter line. Please **DO NOT** rake or sweep the stone into piles or place it on top of catch basins or inlet grates. Also, when using a power broom, it is illegal to throw the stone out onto the street. Please **DO NOT** rake or sweep stone into the street as this creates a hazardous situation to the traveling public. Residents are also asked not to place any litter in the gutter line.

In the areas where there is permitted parking, residents are asked to NOT park along the street until the work is complete. All residents should have their area ready one week in advance of the schedule to allow for schedule updates.

The Street Sweeping Program also involves periodic sweeping of streets in the downtown business district throughout the summer. This will take place every other week until the middle of October. The following is a TENTATIVE schedule of the program. All other roads and streets not listed on the annual schedule will be swept as time permits.
